

HOUSE BILL NO. 5577

February 24, 2026, Introduced by Reps. Roth, Wozniak, MacDonell, Alexander, Prestin, Outman, Kunse and Cavitt and referred to Committee on Regulatory Reform.

A bill to amend 1964 PA 9, entitled
"An act to describe, define, and officially adopt certain systems
of coordinates for designating the position of points on or near
the surface of the earth within this state,"
by amending sections 1, 1a, 3, 4, 6, 7, 8, and 9 (MCL 54.231,
54.231a, 54.233, 54.234, 54.236, 54.237, 54.238, and 54.239),
sections 1, 3, 4, 6, 7, 8, and 9 as amended and section 1a as added
by 1988 PA 154; and to repeal acts and parts of acts.

THE PEOPLE OF THE STATE OF MICHIGAN ENACT:

1 Sec. 1. **(1) This act may be cited as the "state plane**
2 **coordinates act".**

(2) ~~(1)~~ The systems of plane coordinates ~~which~~ **that** are established by the NOAA/NGS for defining and stating the positions of points on or near the surface of the earth ~~within~~ **in** this state shall be known and **are** designated as the Michigan **plane** coordinate system. ~~of 1927, or MCS 27, and the Michigan coordinate system of 1983, or MCS 83.~~

~~(2) For the purpose of the use of these systems, the state is divided into a north zone, a central zone, and a south zone.~~

~~(3) The area included in the following counties constitutes the north zone: Gogebic, Ontonagon, Houghton, Keweenaw, Baraga, Iron, Marquette, Dickinson, Menominee, Alger, Delta, Schoolcraft, Luce, Chippewa, and Mackinac.~~

~~(4) The area included in the following counties constitutes the central zone: Emmet, Cheboygan, Presque Isle, Charlevoix, Leelanau, Antrim, Otsego, Montmorency, Alpena, Benzie, Grand Traverse, Kalkaska, Crawford, Oscoda, Alcona, Manistee, Wexford, Missaukee, Roscommon, Ogemaw, Iosco, Mason, Lake, Osceola, Clare, Gladwin, and Arenac.~~

~~(5) The area included in the following counties constitutes the south zone: Oceana, Newaygo, Mecosta, Isabella, Midland, Bay, Huron, Muskegon, Montcalm, Gratiot, Saginaw, Tuscola, Sanilac, Ottawa, Kent, Ionia, Clinton, Shiawassee, Genesee, Lapeer, St. Clair, Allegan, Barry, Eaton, Ingham, Livingston, Oakland, Macomb, Van Buren, Kalamazoo, Calhoun, Jackson, Washtenaw, Wayne, Berrien, Cass, St. Joseph, Branch, Hillsdale, Lenawee, and Monroe.~~

Sec. 1a. As used in this act:

(a) "Coordinates" means the x and y plane rectangular coordinate values computed for a geographic position from a pair of mutually perpendicular axes. These axes are the meridian and

parallel, ~~defined in sections 5 and 5a,~~ whose intersection defines the origin of each zone.

~~(b) "FGCC" means the federal geodetic control committee of the United States department of commerce or a successor agency to the committee.~~

(b) "Metadata" means data describing other data. Metadata includes, but is not limited to, the geodetic reference system used, applicable epoch, statement of relative accuracy, and date of observation.

(c) "Michigan plane coordinate system" means the system of plane coordinates, which has been established by NOAA/NGS, based on the NSRS, and known as the SPCS, for defining and stating the geographic positions or locations of points in this state.

~~(d) (e) "NOAA/NGS" means the national oceanic and atmospheric administration/national geodetic survey~~ **National Oceanic and Atmospheric Administration/National Geodetic Survey** or a successor agency to the administration.

(e) "NSRS" means the National Spatial Reference System or its successors.

(f) "Zone" means the geographic areas encompassed by closed contiguous county boundaries or submerged lands, or both.

Sec. 3. The coordinates for a point on or near the earth's surface that are used to express the geographic position of that point in the appropriate zone of ~~this~~ **the Michigan plane coordinate system shall must** consist of 2 distances. Each distance ~~shall be expressed in United States survey feet (1 foot = 12/39.37 meters) and decimals of a survey foot if using the Michigan coordinate system of 1927, or shall must~~ be expressed in meters and decimals of a meter or in international feet (1 foot = 0.3048 meter **exactly**)

1 and decimals of an international foot. ~~if using the Michigan~~
 2 ~~coordinate system of 1983.~~ One of these distances, to be known as
 3 the "x-coordinate", ~~shall~~ **must** give the position in an east and
 4 west direction; the other distance, to be known as the "y-
 5 coordinate", ~~shall~~ **must** give the position in a north and south
 6 direction. The coordinates ~~shall~~ **must** depend ~~upon~~ **on** and conform to
 7 values published by the NOAA/NGS. ~~for the monumented points of the~~
 8 ~~North American horizontal geodetic control network, the coordinates~~
 9 ~~of which monumented points were computed on the systems designated~~
 10 ~~in this act.~~

11 Sec. 4. If a tract of land is defined by a single description
 12 and extends from 1 **zone** into another ~~of the coordinate zones~~
 13 ~~described in section 1,~~ **zone**, the positions of all points on the
 14 tract's boundaries may be referred to either of the 2-zones. The
 15 zone ~~which~~ **that** is used for reference ~~shall~~ **must** be specifically
 16 named in the description **and identified in the metadata.**

17 Sec. 6. Coordinates ~~based on either Michigan coordinate system~~
 18 ~~described in this act,~~ purporting to define the position of a point
 19 or a land boundary corner, ~~shall~~ **must** not be presented to be
 20 recorded unless the recording document contains an estimate ~~7~~
 21 ~~expressed as a standard deviation,~~ **at the 95% confidence level** of
 22 the positional tolerance of the coordinates being recorded. The
 23 recording document ~~shall also~~ **must** contain a ~~description of the~~
 24 ~~nearest first or second order horizontal~~ **the metadata and** geodetic
 25 control monument from which the coordinates being recorded were
 26 determined and the method of survey for that determination. ~~If the~~
 27 ~~position of the described first or second order geodetic control~~
 28 ~~monument is not published by the NOAA/NGS, the recording document~~
 29 ~~shall contain a certificate signed by a land surveyor licensed~~

~~under article 20 of the occupational code, Act No. 299 of the Public Acts of 1980, being sections 339.2001 to 339.2014 of the Michigan Compiled Laws, which certificate states that the described control monument and its coordinates have been established and determined in conformance with the specifications given in section 5 or 5a.~~

Sec. 7. ~~(1)~~ The use of the term "Michigan **plane** coordinate system" ~~of 1927~~ on a map, report of survey, or other document ~~shall~~ **must** be limited to coordinates based on the Michigan **plane** coordinate system ~~of 1927 as defined in section 5.~~ **in effect on the date of the survey. The document must contain metadata and the geodetic control monument from which the coordinates being reported were determined and the method of survey for that determination.**

~~(2) The use of the term Michigan coordinate system of 1983 on a map, report of survey, or other document shall be limited to coordinates based on the Michigan coordinate system of 1983 as defined in section 5a.~~

Sec. 8. (1) ~~For the purpose of describing~~ **A description of** the location of a survey station or land boundary corner in ~~the state of Michigan, it shall be considered~~ **this state by the Michigan plane coordinate system is** a complete, legal, and satisfactory description of that location. ~~to give the position of the survey station or land boundary corner by the Michigan coordinate system of 1927 or the Michigan coordinate system of 1983.~~

(2) If the Michigan **plane** coordinate system ~~of 1927 or the Michigan coordinate system of 1983~~ is used to describe a tract of land ~~which in the same document~~ **that** is also described **in the same document** by reference to a subdivision, line, or corner of the United States public land surveys, or to a subdivision plat ~~duly~~

1 ~~recorded in accordance with the subdivision control act of 1967,~~
2 ~~Act No. 288 of the Public Acts of 1967, being sections 560.101 to~~
3 ~~560.293 of the Michigan Compiled Laws, the~~ **under the land division**
4 **act, 1967 PA 288, MCL 560.101 to 560.293, both of the following**
5 **apply:**

6 (a) The description by coordinates ~~shall be construed as is~~
7 supplemental to the basic description of the subdivision, line, or
8 corner contained in the official plats and field notes filed of
9 record. ~~, and in~~

10 (b) In the event of a conflict, the description by reference
11 to the subdivision, line, or corner of the United States public
12 land surveys, or to the recorded subdivision plat, ~~shall prevail~~
13 **prevails** over the description by coordinates.

14 Sec. 9. ~~The Michigan coordinate system of 1927 shall not be~~
15 ~~used after December 31, 1989. The Michigan coordinate system of~~
16 ~~1983 shall be the sole system used after December 31, 1989.~~ **The**
17 **official geodetic reference system to which geodetic coordinates,**
18 **including, but not limited to, latitude, longitude, ellipsoid**
19 **height, orthometric height, or dynamic height, are referenced in**
20 **this state must be defined by the NSRS.**

21 Enacting section 1. Sections 2, 5, and 5a of 1964 PA 9, MCL
22 54.232, 54.235, and 54.235a, are repealed.
