

# SPCS2022 Zone Atlas Michigan

Which of Michigan's 18 SPCS2022 low-distortion zones covers each county. Every county carries its name and its zone code.

Michigan also has one statewide zone, 260001 MI, oblique Mercator, and it covers all 83 counties. It is stated here rather than drawn, because as a nineteenth fill it would cover every other zone on the map.

Zone geometry and parameters — NGS SPCS2022 “Multizone Complete” ArcGIS feature service, captured 2026-08-29; 18 Michigan features. Zone codes, names and projection kinds are that service’s own fields.

County boundaries — U.S. Census Bureau TIGERweb, State\_County layer 1, state FIPS 26, captured 2026-08-29; 83 features.

County-to-zone table — DERIVED by spatial join of those two sources, 14,165 land sample points: 82 of 83 counties resolve unanimously to one zone, Keweenaw splits. NGS publishes no county assignment table; its “Final SPCS2022 Zones” page reads “Table coming soon.”

NGS map sheet — the Michigan zone sheet NGS publishes, MI\_SPCS2022\_18\_zones\_10ppm dated 2022-10-30, is marked “Preliminary SPCS2022 design” on its own face.
